

Dear Charles,

Gliding is fun! It's really cool! Cool and funky! Very funky and extremely cool! So amazing! There are no words in the world that can possibly describe it! When I started and ended I felt kind of quweezy, but I'm sure pilots feel the same way on the first time up in ten years.

I could see farther than the average eye can see when I was in the air. At the end of the trip, I could picture the plane going straight through the ground because the plane was descending so quickly. It was enthralling! Thank you for sweet talking your boss into letting me go up and thank you for paying for me. My family and I will have to repay you somehow, someday. It was a refreshing experience and I hope to be coming back soon. I would recommend gliding to everyone and anyone.

Marlowe Horn
