

Dear Charles,

I would like to thank you for the breath taking experience I experienced gliding at the York Soaring Club. I was very excited about the whole idea of flying and to be able to take the controls of the aircraft. The feeling was incredible! I felt free and liberated, all other thoughts or concerns of which I think of from day to day had disappeared. The adrenaline rush was incredible, I did not want it to end! I never thought I would do something like this, even prior to my injury. In experiencing gliding, I thought to myself...I'm doing things I thought I would never thought I would do. Really, I'm boundless.

Mr.Peterson, can you please advise me of any future opportunity to go up to the heavens once again. I would love to take gliding lessons so I can set off at will. Again, I thank you and the wonderful York Soaring Club and the Canadian Paraplegic Association for an experience of a life time. I'm sure your organization has impacted other lives as much as it has mine.

Sincerely

Flavio Pagliero
